Independent music & visual project

A LOVE STORY ACROSS TIME AND THE UNIVERSE

From a rainy New York night to distant galaxies and earlier eras of humanity, GRAVITY explores love as a force that transcends time, culture and generations.

THE HUMAN VISION BEHIND THE AI-ASSISTED FILM

Alexandre Chiaretto wrote the entire story and screenplay. He imagined and directed the creation of each image and scene: actions, expressions, framing, and the desired style of costumes and settings. AI tools generated the visuals and their detailed execution. He selected the results and edited the film. ChatGPT helped phrase some instructions from his ideas. He wrote the lyrics; music and vocals were generated with Brev.ai under his artistic direction.

“AI does not create the emotion. The emotion comes from us.”

JAPANESE MEDIA COVERAGE | 10 OCTOBER 2026

indiegrab (Japan) featured GRAVITY in its music news coverage, highlighting the New York-to-cosmos story, the journey through eras, and the creator’s hands-on direction of AI-generated music and visual sequences.

GRAVITY

LOVE ACROSS TIME

“Worlds change. Generations pass. Love remains.”

THE STORY

In New York, a woman sees a love story on illuminated screens. The man reaches through the screen and their connection becomes real. Their cosmic journey evokes a return through time, echoing the love of generations before them.

Snow White evokes stories passed down through generations; an imagined Eden suggests the symbolic origins of love. Back in New York, the golden apple connects the present to the tale.

THE ENCOUNTER

A connection crosses the screen.

THE JOURNEY

Space becomes a metaphor for time.

THE TALE

Snow White: stories across generations.

THE ORIGINS

An imagined Eden, beyond one era.

EMOTION COMES FIRST

“For me, creating begins with emotion and the desire to share it. In a divided world, I see music as a meeting place: across countries and generations, we can recognise something of ourselves in another person’s feelings. GRAVITY expresses my belief in love as a bond between people and generations.”

— Alexandre Chiaretto

AI AS A BRIDGE

AI helps me give visible and audible form to my imagination. I wrote the lyrics and screenplay, conceived the scenes, guided image and animation generation, selected the material and edited the film. I also defined the musical style, atmosphere and vocal expression.

Music, vocals, images and video sequences generated with AI tools under Alexandre Chiaretto’s artistic direction.

CONCEIVED, DIRECTED & EDITED BY ALEXANDRE CHIARETTO
